New Mexico State University’s (NMSU) Department of Agricultural Economics and Agricultural Business seeks a 9-month Assistant Professor of Agricultural Economics and Agricultural Business. The successful candidate will establish a nationally recognized research and teaching program related to applied agricultural economics and agricultural business.

A Ph.D. in Agricultural Economics or a closely related field is required. Preferred qualifications include: (1) evidence of interest and expertise in agricultural economics and agribusiness management with specific interest and skills in food and agricultural finance and business management; (2) demonstrated capacity and interest to engage New Mexico stakeholders in developing research programs relevant to state, regional, and national agricultural issues; (3) evidence of effective communication with a range of audiences, such as industry stakeholders, policymakers, and academics; (4) success in identifying and sourcing external funding; and (5) experience or interest in agricultural issues of the Western U.S., particularly the southwest.

Applications must be submitted online by 2/28/2022. For the complete job description, qualifications, and application process visit: https://jobs.nmsu.edu/. Please go to posting #2100204F to apply online at NMSU.

NMSU is an equal opportunity and affirmative action employer. Women and Minorities are encouraged to apply.
